Software Engineer and Full-Stack Developer with hands-on internship experience in building responsive web applications and modern user interfaces. Skilled in React.js, Next.js, JavaScript, Tailwind CSS, Laravel, MySQL, and frontend development. Experienced in developing fintech-related platforms, CRM dashboards, and travel-based web applications with a strong focus on clean UI/UX, responsive design, and performance optimization

Expirence

Full-Stack Developer Intern | Oscorm Digital Pvt. Ltd.

Nov – May 2026

- Developed the frontend of a fintech-based borrowing platform using **Next.js** and **Tailwind CSS**, creating responsive and user-friendly interfaces and improving loads time by **40%**.
- Designed and built a CRM dashboard frontend with reusable **UI components** and and increasing client engagement by **30%**.
- Worked on the backend of a travel-related web application using the Laravel framework, implementing APIs and database connectivity.
- Collaborated with the development team to deliver scalable web solutions and optimizing web applications for **99%** uptime.
- Participated in debugging, testing, and deploying web applications while following modern development practices.

Key Skills

Languages: HTML, JavaScript, TypeScript, Python, C++

Frontend: React.js, Next.js, TailwindCSS, PHP

Backend: Node.js, Express.js, Laravel, Django

Database: MySQL, MongoDB, PostgreSQL

Tools: Git, Github, Postman

Projects

AI-Powered Issue Tracker Platform | [Github Link](#)

- Developed a full-stack project management and issue tracking platform using **Next.js**, **Node.js**, and **MySQL**. Implemented secure JWT-based authentication and role-based access control for users and admins.
- Designed responsive dashboards, Kanban boards, and task management interfaces using Tailwind CSS.
- Built RESTful APIs for task creation, updates, comments, and project collaboration features.
- Optimized application performance and improved frontend responsiveness for better user experience

Travel & Booking Management System | [GitHub Link](#)

- Built a scalable full-stack travel management platform using Laravel Framework Developed secure backend APIs with authentication, database management, and booking functionalities.
- Designed modern responsive frontend dashboards and booking interfaces using Laravel and CSS. Integrated CRUD operations, user management, and real-time booking status features.
- Improved application security and API performance through optimized backend architecture.

CRM Dashboard & Admin Management System | Developed during internship at [Oscorm CRM](#)

- Designed and developed a responsive CRM dashboard for managing customers, leads, and business operations during my Full-Stack Development internship.
- Implemented admin authentication, dashboard analytics, data management modules, and user-friendly UI components for efficient workflow handling.
- Worked on frontend and backend integration, database operations, and secure role-based access features to improve system usability and performance.
- Technologies used: Next.js, Django, MySQL, REST APIs, HTML, CSS, JavaScript (change according to your actual stack).

Education

Shree Siddhi Vinayak Group Institution of Technology , Bareilly (U.P)

B.Tech in Computer Science

2022 – 2026

CGPA: 7.1/10

Certificates and Achievements

- Python development with Django in Netcamp
- Certification in Excel / Power BI / Python / SQL
- Certification in Networking / Android Development
- Certification in Summer Internship / Industrial Internship /Full Stack Developer Internship
